

Key DevSecOps Achievements

- Built and owned end-to-end CI/CD platforms from pipeline design and IaC provisioning through security gates, approval workflows, deployment automation, rollback strategy, and production support across Azure and AWS.
- Implemented DevSecOps controls using **SAST/DAST**, container and IaC scanning, **SBOM generation**, secrets management, and **policy-as-code** with OPA/Gatekeeper and Polaris, reducing security exposure and improving audit readiness.
- Delivered secure Kubernetes and multi-cloud platforms on **AKS/EKS** with Terraform, Ansible, GitOps, runtime security, observability, and API gateway patterns using **Azure API Management**, **AWS API Gateway**, and **Application Gateway/WAF**.
- Improved release speed and deployment reliability through standardized CI/CD templates, quality gates, automated remediation, and secure artifact promotion across enterprise environments.

Professional Experience Summary

Company	Designation	Duration	Key Projects/Focus
Infosys (Truelancer Payroll Company)	DevOps Consultant / DevSecOps Engineer	May 2024 – Till Date	Kubernetes Cluster Automation (Terraform/Ansible/kubeadm), Prometheus & Grafana, DevSecOps (Trivy, Jenkins, Nexus), JFrog Xray & Gerrit POC
Turing	Senior Multi-Cloud/DevOps Engineer (Azure/AWS)	April 2022 – April 2024	Azure AKS & AWS EKS Orchestration, Multi-Cloud CI/CD, Ansible Infrastructure Automation, GitOps with ArgoCD, Enterprise Cloud Infrastructure
ATT Solutions Pvt Ltd	Senior Cloud Engineer (Azure/AWS)	October 2016 – March 2022	Multi-Cloud Migration (200+ apps), AKS/EKS & Service Mesh, Terraform for Azure & AWS, CI/CD Automation, Infrastructure as Code
CA Technologies	Senior Software Engineer	June 2016 – October 2016	Ansible Automation, Enterprise Software Development, CI/CD Implementation, Agile Methodologies
Tech Mahindra	Senior Software Engineer	October 2014 – June 2016	Ansible Automation & Playbook Development, CI/CD Pipeline Architecture, Configuration Management, Containerization
Wipro Limited	Software Engineer	October 2011 – October 2014	Ansible Playbook Development, Application Packaging, Enterprise Deployment, Virtualization Infrastructure

Multi-Cloud Expertise Highlights

Azure Domain	Key Capabilities
Azure Kubernetes Service (AKS)	50+ production clusters, Workload Identity, AGIC, Calico, KEDA, GitOps (Flux/ArgoCD), Container Insights
Azure DevOps	YAML Pipelines, Environments, Deployment Gates, Azure Artifacts, Service Connections, Pipeline Templates
Azure Networking	Virtual Networks, Private Link, ExpressRoute, Front Door, Application Gateway, Firewall, VPN Gateway
Azure Security	Defender for Cloud, Defender for Containers, Sentinel (SIEM), Key Vault, Azure Policy, PIM, Conditional Access
Azure IaC	Bicep (100+ modules), ARM Templates, Terraform Azure Provider, Azure Blueprints, Resource Graph
Azure Monitoring	Azure Monitor, Application Insights, Log Analytics, Container Insights, Managed Prometheus, Workbooks
Azure Governance	Landing Zones, Management Groups, Azure Policy, Cost Management, Azure Advisor, Compliance

AWS Domain	Key Capabilities
Amazon EKS	30+ production clusters, IAM Roles for Service Accounts (IRSA), Fargate, Karpenter, GitOps (ArgoCD/Flux), CloudWatch Container Insights
AWS CI/CD	CodePipeline, CodeBuild, CodeDeploy, GitHub Actions with AWS, Jenkins on EC2, Artifact Management with S3/ECR
AWS Networking	VPC Architecture, Transit Gateway, Direct Connect, CloudFront CDN, ALB/NLB, Route 53, PrivateLink
AWS Security	Security Hub, GuardDuty, AWS WAF, Secrets Manager, KMS, IAM Policies, Organizations SCPs
AWS IaC	CloudFormation (100+ stacks), Terraform AWS Provider, CDK, SAM for Serverless
AWS Monitoring	CloudWatch, X-Ray, CloudWatch Container Insights, Prometheus (AMP), Grafana (AMG)
AWS Governance	Control Tower, Organizations, Service Control Policies, AWS Config, Cost Explorer, Trusted Advisor

Multi-Cloud Consultant (Azure/AWS) | Senior DevSecOps Engineer | Ansible Developer & Automation Specialist

*Innovative **Multi-Cloud Consultant** and **Senior DevSecOps Engineer** with 13+ years of progressive experience in **Azure and AWS cloud consulting**, **Kubernetes orchestration (AKS/EKS)**, cloud-native infrastructure automation, and **end-to-end CI/CD ownership** across enterprise environments. Proven background in designing, securing, and operating delivery pipelines from source control and build automation through **SAST/DAST**, artifact governance, secrets management, policy enforcement, deployment orchestration, and production rollout. **Highly skilled Ansible Developer** with extensive hands-on experience in **Ansible playbook coding**, developing 200+ production-grade playbooks, 100+ reusable roles, custom Python modules, Jinja2 templates, and Ansible Collections. Expert in Ansible development best practices including **Molecule testing**, **ansible-lint**, **yamllint**, **Git-based version control**, and CI/CD integration for automated playbook validation. With **8+ years of hands-on Azure expertise** and **6+ years of AWS expertise** including **Azure AKS/AWS EKS**, **Azure DevOps/AWS CodePipeline**, **Azure/AWS Landing Zones**, **Azure API Management/AWS API Gateway**, **Azure Arc**, **AWS Control Tower**, **Azure Container Apps/AWS ECS**, **Azure Service Bus/AWS SQS/SNS**, and enterprise-scale deployment solutions across multi-cloud environments. Strong foundation in Infrastructure as Code (Terraform, **Ansible**, CloudFormation, Bicep), Kubernetes orchestration, **PowerShell automation**, **Python scripting (Azure SDK, Boto3)**, containerization with Docker, microservices architecture, and secure, scalable multi-cloud architectures. Additional exposure to **Fastlane-based mobile CI/CD concepts** for build, signing, and release automation. Active participant in **Ansible Community of Practice**, conducting technical sessions on playbook development best practices and sharing automation solutions. Certified in Microsoft Azure and AWS with hands-on experience in DevSecOps, Site Reliability Engineering (SRE), and FinOps practices.*

Technical Skills

Cloud Platforms:
Microsoft Azure (Primary Cloud - 8+ Years): **Azure Kubernetes Service (AKS)** (Production clusters, Node pools, Pod Identity, Workload Identity, Azure CNI, Calico Network Policies, Azure Policy for AKS, Cluster Autoscaler, Virtual Nodes), **Azure DevOps** (YAML Pipelines, Environments, Deployment Gates, Service Connections, Azure Artifacts), **Azure Landing Zones** (Enterprise-Scale Architecture, Management Groups, Azure Policy, Azure Blueprints), **Azure Arc** (Hybrid Kubernetes, Arc-enabled servers), **Azure Container Registry (ACR)** (Geo-replication, Content Trust, Vulnerability Scanning), **Azure Container Apps**, **Azure App Service**, **Azure Functions** (Consumption & Premium Plans), **Azure Logic Apps**, **Azure Service Bus**, **Azure Event Hub**, **Azure Event Grid**, **Azure API Management (APIM)**, **Azure Front Door** (WAF, CDN, Global Load Balancing), **Azure Application Gateway** (WAF v2, URL-based routing), **Azure Load Balancer**, **Azure Traffic Manager**, **Azure Virtual Network (VNet)** (Peering, Private Endpoints, Service Endpoints, NSG, ASG), **Azure Firewall** (Premium, Policy Management), **Azure Private Link**, **Azure ExpressRoute**, **Azure VPN Gateway**, **Azure Bastion**, **Azure Storage** (Blob, Files, Queue, Table, Data Lake Gen2), **Azure SQL Database** (Managed Instance, Elastic Pools), **Azure Cosmos DB**, **Azure Redis Cache**, **Azure Monitor** (Application Insights, Log Analytics, Azure Workbooks, Alerts, Autoscale), **Azure Bicep**, **ARM Templates**, **Azure Resource Graph**, **Azure CLI**, **Azure PowerShell**, **Azure Active Directory (Entra ID)** (Conditional Access, PIM, App Registrations, Managed Identities), **Azure Key Vault** (Secrets, Keys, Certificates, HSM), **Azure Policy** (Custom Policies, Initiatives, Compliance), **Azure Cost Management** (Budgets, Cost Analysis, Advisor), **Azure Migrate**, **Azure Site Recovery (ASR)**
Amazon Web Services - AWS (6+ Years): **Amazon EKS** (Production clusters, Fargate, Karpenter, IRSA, EKS Add-ons, EKS Blueprints), **AWS CodePipeline/CodeBuild/CodeDeploy** (CI/CD, Blue-Green/Canary), **AWS VPC** (Transit Gateway, Direct Connect, PrivateLink, VPC Peering, NAT Gateway), **AWS Lambda** (Serverless, Step Functions, EventBridge), **Amazon ECR** (Container Registry, Image Scanning), **AWS ECS** (Fargate, EC2 Launch Type, Service Connect), **AWS CloudFormation** (Stacks, StackSets, Nested Stacks), **AWS CDK** (TypeScript, Python), **Amazon S3** (Lifecycle Policies, Cross-Region Replication, S3 Glacier), **Amazon RDS** (Aurora, Multi-AZ, Read Replicas), **Amazon DynamoDB** (Global Tables, DAX), **AWS IAM** (Roles, Policies, Organizations, SCPs), **AWS Secrets Manager**, **AWS KMS**, **AWS Security Hub**, **AWS GuardDuty**, **AWS WAF**, **Amazon CloudWatch** (Metrics, Logs, Alarms, Container Insights), **AWS X-Ray** (Distributed Tracing), **Amazon Managed Prometheus (AMP)**, **Amazon Managed Grafana (AMG)**, **AWS Control Tower** (Landing Zones, Account Factory), **AWS Organizations**, **AWS Cost Explorer**, **AWS Trusted Advisor**
Google Cloud Platform - GCP: GKE, Cloud Functions, Cloud Storage, Cloud Run
Hybrid Cloud: VMware vSphere, Hyper-V, Azure Stack HCI, AWS Outposts, Multi-Cloud Architecture

DevOps & Automation Tools:
Terraform (Infrastructure as Code, State Management, Modules), **Ansible** (Extensive Experience - Playbook Development, Reusable Roles, Ansible Galaxy, Ansible Tower/AWX, Ansible Automation Platform, Execution Environments, Dynamic Inventory, Jinja2 Templates, Ansible Vault, Collections, Modules Development, Day 2 Operations, Self-Healing Automation, Moogsoft/New Relic Integration), **Jenkins** (CI/CD Pipelines, Blue Ocean, Multibranch Pipelines), **Azure DevOps Pipelines** (YAML Pipelines, Classic Pipelines, Release Management), **GitHub Actions** (Workflows, Runners, Secrets Management), **GitLab CI/CD**, **ArgoCD** (GitOps, Application Delivery), **Flux**, **Nexus Repository**, **JFrog Artifactory**, **Fastlane** (**Working Knowledge - mobile CI/CD concepts, signing, build and release automation**), **Git** (Version Control, Branching Strategies), **Puppet** (Configuration Management)

Ansible Development & Automation (Extensive Expertise):
Playbook Development (Complex YAML workflows, Multi-play orchestration, Error handling, Idempotent task design), **Role Development** (Ansible Galaxy structure, Role dependencies, Meta configuration, Defaults/Vars precedence), **Jinja2 Templating** (Dynamic configuration files, Conditional logic, Filters, Macros, Template inheritance), **Custom Module Development** (Python-based modules, Module arguments, Return values, Documentation strings), **Ansible Collections** (Collection structure, Namespace management, Publishing to Galaxy), **Dynamic Inventory Scripts** (Python/Bash scripts, Azure/AWS inventory plugins, Custom inventory sources), **Ansible Vault** (Encrypted variables, Vault IDs, Secrets management integration), **Testing & Quality** (Molecule testing framework, ansible-lint, yamllint, Ansible-test, CI/CD integration), **Ansible Tower/AWX** (Workflow templates, Job templates, Inventories, Credentials, RBAC, Surveys, Notifications), **Execution Environments** (ansible-

builder, Container images, Dependency management), Callback Plugins (Custom reporting, Slack/Teams integration, Audit logging) , Lookup Plugins (File lookups, API integrations, HashiCorp Vault), Filter Plugins (Custom data transformation, JSON/YAML manipulation)

Containerization & Orchestration:

Azure Kubernetes Service (AKS) - Primary Expertise: Production cluster management (50+ clusters), **AKS Node Pools** (System/User pools, Spot instances, Virtual Nodes with ACI), **AKS Networking** (Azure CNI, Kubenet, Azure CNI Overlay, Calico Network Policies), **AKS Security** (Azure AD integration, Azure RBAC for Kubernetes, Pod Identity, Workload Identity, Azure Policy for AKS, Defender for Containers), **AKS Scaling** (Cluster Autoscaler, Horizontal Pod Autoscaler, KEDA), **AKS Ingress** (Application Gateway Ingress Controller - AGIC, Nginx Ingress, Traefik), **AKS Service Mesh** (Istio, Open Service Mesh, Linkerd), **AKS GitOps** (Flux v2, ArgoCD), **AKS Monitoring** (Container Insights, Prometheus, Grafana, Azure Monitor managed Prometheus), **Azure Container Registry (ACR)** integration
Other Kubernetes: Amazon EKS, Google GKE, On-Premises (kubeadm, Rancher, OpenShift)
Container Tools: Docker (Multi-stage Builds, BuildKit, Docker Compose), Helm (Chart Development, Helmfile), Kustomize, Podman
Service Mesh: Istio, Open Service Mesh (OSM), Consul Connect, Linkerd

Security & Compliance:

Microsoft Defender for Cloud (Cloud Security Posture Management - CSPM, Workload Protection), **Microsoft Defender for Containers** (AKS vulnerability scanning, runtime protection), **Microsoft Sentinel** (SIEM, SOAR, Azure-native security analytics), **Azure Key Vault** (Secrets, Keys, Certificates, HSM-backed keys), **Azure Policy** (Compliance, Custom policies, Remediation tasks), **Azure AD Privileged Identity Management (PIM)**, **Azure AD Conditional Access**, **Trivy** (Container Security Scanning, Filesystem Scanning, SBOM Generation, CycloneDX, SPDX), **SonarQube** (SAST, Code Quality, Security Scanning), **Acunetix** (DAST, Web Application Security Testing), **Mend** (Open Source Security), **Polaris** (Policy as Code), **HashiCorp Vault** (Secret Management, Encryption), **Kubernetes RBAC**, **SOC2 Compliance**, **HIPAA Compliance**, **GDPR Compliance**, **PCI DSS**, **OWASP Security Standards**, **CIS Benchmarks for Azure**

Monitoring & Observability:

Prometheus (Metrics Collection, Alerting, PromQL), **Grafana** (Visualization, Dashboards, Alerting, Loki integration), **Azure Monitor** (Application Insights, Log Analytics), **Kube-state-metrics**, **Loki** (Log Aggregation), **Thanos** (Prometheus Long-term Storage), **PagerDuty** (Incident Management)

Programming/Scripting:

Azure PowerShell (Az module, Azure automation, Resource Graph queries, Azure Functions development), **Azure CLI** (Bash scripting, automation scripts, DevOps integration), **Python** (Azure SDK for Python, Boto3, Django, Flask Web Applications, REST APIs, Kubernetes client, Docker SDK), **Bash Scripting** (Linux automation, deployment scripts), **KQL - Kusto Query Language** (Azure Monitor, Log Analytics, Azure Resource Graph, Microsoft Sentinel), **Groovy** (Jenkins Pipeline scripting, Shared Libraries), **Java** (Spring Boot, Maven, Gradle), **C#** (.NET Core, ASP.NET, Azure Functions), **JavaScript/TypeScript** (Node.js, React, Azure Functions), **YAML** (Azure Pipelines, Kubernetes, Ansible), **JSON** (ARM Templates, Configuration), **SQL** (Azure SQL, Database Management)

Infrastructure as Code:

Azure Bicep (Domain-Specific Language, Modules, Parameter files, What-if deployments), **ARM Templates** (Linked templates, Template specs, Deployment scripts), **Terraform** (Azure Provider, AzureRM, AzAPI, State Management in Azure Storage, Terraform Cloud), **AWS CloudFormation**, **Pulumi** (Modern Infrastructure as Code with Azure native provider), **Azure Resource Graph** (KQL queries for resource inventory), **Kubernetes Manifests** (YAML Configuration), **Kustomize**, **Azure Blueprints** (Governance as Code)

Application Packaging & Virtualization:

Microsoft App-V (Application Virtualization, Streaming), **VMware ThinApp** (Application Packaging), **MSI Packaging** (Windows Installer), **Docker Containerization**, **VMware vSphere** (Virtualization Infrastructure), **Microsoft Hyper-V** (Virtualization Platform), **Citrix XenApp** (Application Delivery), **Microsoft System Center Configuration Manager - SCCM** (Software Distribution, Patch Management), **VDI** (Virtual Desktop Infrastructure), **Azure Virtual Desktop** (AVD)

Practices:

GitOps (ArgoCD, Flux, Continuous Deployment), **Infrastructure as Code - IaC** (Terraform, CloudFormation, ARM Templates), **Policy as Code** (Open Policy Agent - OPA, Gatekeeper), **Cloud Native Architecture** (Microservices, Serverless, Event-Driven), **Microservices Architecture** (API Gateway, Service Discovery, Circuit Breaker), **API Gateway Management** (Azure API Management, AWS API Gateway, Application Gateway/WAF, Kong/Apigeer awareness), **Service Mesh** (Istio, Linkerd, Consul Connect), **Site Reliability Engineering - SRE** (Error Budgets, SLI/SLO, Incident Response), **FinOps** (Cost Optimization, Resource Tagging, Budget Management), **Multi-Cloud Strategy** (AWS, Azure, GCP), **Hybrid Cloud Architecture** (On-premises, Public Cloud Integration), **Agile Methodologies** (Scrum, Kanban, Sprint Planning), **Enterprise IT Operations** (ITIL, Change Management, Incident Management), **Global Team Collaboration** (Remote Work, Cross-timezone Coordination), **Software Development Life Cycle - SDLC** (Waterfall, Agile, DevOps), **Continuous Integration/Continuous Deployment - CI/CD** (Pipeline Design, Automated Testing, Secure Release Governance), **Project Management** (PMI, Agile Project Management)

Docker & Container DevOps:

Docker (Multi-stage Builds, BuildKit, Docker Compose, Docker Swarm, Dockerfile optimization, Image layering best practices), **Container Registries** (Azure Container Registry, Docker Hub, JFrog Artifactory, Nexus Repository, Harbor), **Container Security** (Trivy scanning, Image signing, Runtime security, Distrosless images), **Container Networking** (Bridge, Host, Overlay networks, CNI plugins), **Container Orchestration** (Docker Compose for development, Kubernetes for production), **Container Logging** (Fluentd, Fluent Bit, containerized logging patterns)

Collaboration & Project Management:

Atlassian Jira (Project Management, Issue Tracking, Agile Boards), **Atlassian Confluence** (Documentation, Knowledge Management), **GitHub** (Version Control, Pull Requests, Actions), **GitLab** (Version Control, CI/CD, Project Management), **Microsoft Teams** (Communication, Collaboration), **Slack** (Team Communication, Integrations), **Zoom** (Video Conferencing, Screen Sharing), **Trello** (Task Management, Kanban Boards), **Asana** (Project Management, Team Collaboration)

Security & Compliance:

Cybersecurity (Threat Detection, Incident Response, Security Monitoring), **Security Analysis** (Log Analysis, Threat Intelligence, Risk Assessment), **Compliance Management** (SOC2, ISO 27001, GDPR, HIPAA), **Vulnerability Management** (Scanning, Remediation, Reporting), **Identity and Access Management - IAM** (Role-Based Access Control - RBAC, Single Sign-On - SSO), **Network Security** (Firewalls, VPN, Network Segmentation), **Data Protection** (Encryption, Backup, Recovery)

Certifications:

Microsoft Azure Fundamentals (AZ-900) ☑, **AWS Certified Solutions Architect - Associate** ☑, **Microsoft Azure Administrator (AZ-104)** (In Progress), **Microsoft Azure Solutions Architect Expert (AZ-305)** (In Progress), **Microsoft Azure DevOps Engineer Expert (AZ-400)** (In Progress), **Microsoft Azure Security Engineer (AZ-500)** (In Progress), **AWS Certified DevOps Engineer - Professional** (In Progress), **AWS Certified Security - Specialty** (In Progress), **Certified Kubernetes Administrator - CKA** (In Progress), **Red Hat Certified Engineer - Ansible Automation** (In Progress), **Terraform Associate** (In Progress)

Professional Experience

DevOps Consultant / DevSecOps Engineer

Infosys (Truelancer Payroll Company) | May 2024 – Till Date

- ☑ **End-to-End CI/CD Ownership:** Owned full delivery lifecycle for cloud and platform initiatives across **Azure DevOps**, **Jenkins**, and Git-based workflows, covering pipeline design, branch strategy, build automation, security gates, artifact promotion, deployment approvals, rollback plans, and production release governance.

Project 1: Kubernetes Cluster Automation & Infrastructure as Code

June 2024 – August 2024

- **✳️ Unmanaged Kubernetes Cluster Automation:** Designed and implemented end-to-end automation for provisioning **self-managed Kubernetes clusters** on **AWS EC2 instances** using **Terraform** and **Ansible**. Created production-ready clusters without relying on managed services like EKS, providing full control over cluster configuration, networking, and upgrades.
- **🏗️ Terraform Infrastructure Provisioning:** Developed comprehensive **Terraform modules** for provisioning AWS infrastructure including **EC2 instances** (master and worker nodes), **VPC with public/private subnets**, **Security Groups** with precise ingress/egress rules for Kubernetes networking, **Elastic Load Balancer (ELB/NLB)** for API server high availability, **IAM roles and policies**, and **EBS volumes** for persistent storage.
- **⚙️ Kubeadm Cluster Bootstrap Automation:** Automated **kubeadm** cluster initialization and joining using **Ansible playbooks**. Developed playbooks for installing container runtime (containerd), kubeadm, kubelet, and kubectrl on all nodes, initializing control plane with kubeadm init, generating and distributing join tokens for worker nodes, and configuring kubectrl for cluster administration.
- **🔧 Ansible Configuration Management:** Created 20+ **Ansible roles** for Kubernetes cluster configuration including OS hardening, kernel parameter tuning (sysctl for networking), disabling swap, configuring container runtime, installing CNI plugins (Calico/Flannel), and setting up cluster networking.
- **📊 Prometheus & Grafana Monitoring Stack:** Implemented complete observability stack using **Terraform** and **Ansible** automation. Deployed **Prometheus** for metrics collection, **Grafana** for visualization with pre-configured dashboards for cluster health, node metrics, pod metrics, and application performance. Created Ansible roles for deploying kube-state-metrics, node-exporter, and alertmanager with custom alerting rules.
- **⚖️ Load Balancer Configuration:** Provisioned and configured **AWS Network Load Balancer (NLB)** using Terraform for Kubernetes API server high availability across multiple master nodes. Implemented health checks, target group registration automation, and DNS configuration for cluster endpoint.
- **📖 Infrastructure Documentation:** Created comprehensive documentation including architecture diagrams, runbooks for cluster operations, and troubleshooting guides for common Kubernetes issues.

Key Deliverables: • Terraform modules for complete AWS infrastructure (VPC, EC2, NLB, Security Groups, IAM) • Ansible playbooks for kubeadm cluster bootstrap and configuration • Prometheus + Grafana monitoring stack with custom dashboards • Infrastructure as Code repository with CI/CD pipeline for validation

Project 2: DevSecOps Implementation & Security Tooling

September 2024 – Till Date

- **🔍 Trivy Security Scanner Implementation:** Architected and implemented enterprise-wide **Trivy security scanning** solution for container image vulnerability detection, filesystem scanning, and Infrastructure as Code (IaC) security analysis. Configured Trivy for scanning Docker images, Kubernetes manifests, Terraform files, and application dependencies as part of secure CI/CD quality gates.
- **📊 Custom Trivy Dashboard Development:** Designed and developed a comprehensive **Python Flask-based Trivy dashboard** for visualizing security scan results. Implemented features including real-time vulnerability analytics, severity-based risk scoring (Critical/High/Medium/Low), CVE tracking and trending, SBOM (Software Bill of Materials) visualization, and component dependency analysis.
- **🗃️ Nexus Repository Integration:** Integrated Trivy dashboard with **Nexus Repository Manager** for centralized storage and retrieval of scan reports. Developed automated report upload mechanism, implemented API integration for fetching historical scan data, and created report comparison features for tracking vulnerability remediation progress across releases.
- **🛡️ DevSecOps Control Implementation:** Integrated **SAST/DAST**, container scanning, IaC scanning, and **policy-as-code** checks into secure delivery workflows using **SonarQube**, **Acunetix**, **Trivy**, **Polaris**, and OPA-based policy validation to block non-compliant changes before deployment.
- **🔄 Jenkins Pipeline Integration:** Developed **Jenkins declarative pipelines** and **Groovy shared libraries** for automated Trivy scanning in CI/CD workflows. Created reusable pipeline functions including `runTrivyScan()` for executing scans, `parseTrivyReports()` for processing JSON/SARIF outputs, `uploadReportsToNexus()` for artifact storage, and `failOnSeverity()` for enforcing security gates based on vulnerability thresholds.
- **📄 SBOM Generation & Management:** Implemented automated **SBOM generation** in CycloneDX and SPDX formats using Trivy. Created pipelines for generating, storing, and tracking software composition across all container images and applications, enabling compliance with software supply chain security requirements.
- **🔐 Gerrit Code Review POC:** Conducted proof-of-concept implementation of **Gerrit** code review system. Evaluated Gerrit for enterprise code review workflows, configured integration with Jenkins for automated builds on patch sets, and documented best practices for code review processes and approval workflows.
- **🦋 JFrog Xray POC:** Implemented proof-of-concept for **JFrog Xray** security scanning integrated with JFrog Artifactory. Evaluated Xray's vulnerability database, license compliance features, and impact analysis capabilities. Compared functionality with Trivy for enterprise security requirements and documented recommendations for tool selection.
- **📈 Security Metrics & Reporting:** Created automated security reporting dashboards showing vulnerability trends, mean time to remediation (MTTR), compliance status, and security debt tracking across all projects and teams.

Key Deliverables: • Trivy security dashboard with Nexus integration (Python Flask) • Jenkins shared library for Trivy scanning pipelines • SBOM generation and management automation • POC documentation for Gerrit and JFrog Xray • Security metrics dashboards and reporting framework

Senior Multi-Cloud/DevOps Engineer (Azure/AWS)

Turing | April 2022 – April 2024

- **🧠 Generative AI & LLM Infrastructure Specialist:** Built cloud, DevOps, and automation solutions at a company that integrated **generative Artificial Intelligence (AI)** into businesses with application development, **large language model (LLM) training**, and data enhancement. Implemented various DevOps and automation services as part of AI/ML project execution.
- **☄️ Multi-Cloud Infrastructure Expert:** Engineered and managed enterprise-grade **Azure and AWS cloud infrastructure** including **Azure AKS/AWS EKS**, **Azure VMs/AWS EC2**, **Azure Storage/S3**, and **Azure VNet/AWS VPC** networking - achieving exceptional 99.9% uptime and unlimited scalability for high-performance computing workloads across both cloud platforms.
- **🏗️ GitLab CI Build & Release Automation:** Developed build and release automation processes utilizing **GitLab CI** pipelines. Managed infrastructure using **Terraform** and cloud-specific tools on **AWS** and **Microsoft Azure**. Worked extensively within Kubernetes environments utilizing **Azure AKS** and **Amazon EKS**.
- **🔒 Secure CI/CD Ownership:** Owned design and operation of multi-cloud CI/CD workflows from build and test stages through security validation, artifact publication, deployment orchestration, rollback planning, and post-release support for containerized platforms.
- **🐍 Python RPM Packaging & Distribution:** Packaged products using **Python's setuptools** to create **RPM files** for distribution to end users. Collaborated with team members to write Python code within a virtualized **pipx environment** for RPM file creation. Ensured comprehensive list of command-line options in the RPM file for deploying environments on end users' cloud accounts.
- **⚙️ Helm & Helmfile Kubernetes Deployments:** Utilized **Helm** and **Helmfile** to create customized charts and deploy them as part of continuous integration pipelines. Troubleshot issues related to deployment, configuration, and administration of products across multi-cloud Kubernetes environments.
- **🧪 AI Testing Engineer for Anthropic Claude Models:** Worked with **Anthropic** through Turing to test and validate **Claude AI model outputs** for DevOps and cloud automation use cases. Designed and executed 500+ test scenarios covering **multi-cloud Kubernetes architecture** design, **Terraform code generation** for Azure/AWS infrastructure, **Ansible playbook creation**, CI/CD pipeline configurations, and Infrastructure as Code validation. Evaluated AI-generated outputs for accuracy, best practices compliance, security considerations, and production-readiness - providing detailed feedback to improve model performance for technical use cases.
- **🏆 Automation Excellence:** Developed sophisticated **Python-based** automation frameworks (pytest, unittest, custom libraries), seamlessly integrated with **Git**

workflows and **Jira** project management for systematic tracking and comprehensive documentation.

- **Enterprise DevOps Integration:** Masterfully applied proven **DevOps** methodologies and **Azure/AWS Cloud** infrastructure management to create scalable, enterprise-level environments that support innovation, managing CI/CD pipelines for application deployment and testing across multi-cloud.
- **Ansible Infrastructure Automation Leader:** Spearheaded enterprise-wide **Ansible automation initiative** across 150+ Linux and Windows servers on **Azure VMs** and **AWS EC2**, developing sophisticated **Ansible playbooks** with advanced features including dynamic inventory (Azure, AWS), custom Jinja2 templates, Ansible Vault for secrets management, and **reusable role libraries**. Reduced configuration drift by 60% and enabled self-service infrastructure provisioning through **Ansible Tower** surveys and workflows.
- **Ansible Role Developer & Collections Architect:** Developed and maintained 40+ **reusable Ansible roles** following Ansible Galaxy best practices with proper directory structure (tasks, handlers, templates, vars, defaults, meta). Created **Ansible Collections** for organization-specific automation modules, packaging related roles, plugins, and playbooks for distribution via private Ansible Galaxy. Implemented role dependencies, conditional includes, and variable precedence management for complex multi-tier deployments.
- **Ansible Testing & CI/CD Integration:** Implemented comprehensive **Molecule testing framework** for Ansible role validation with Docker/Podman drivers, developing test scenarios for idempotency verification, syntax checking, and functional testing. Integrated ansible-lint, yamllint, and ansible-test into CI/CD pipelines (Jenkins, Azure DevOps) for automated code quality gates before playbook deployment to production.
- **Ansible Integration Specialist:** Integrated **Ansible** with enterprise monitoring and incident management tools including **New Relic** APM for application performance triggers, **PagerDuty** for incident management, and custom REST API callbacks for real-time automation status updates. Developed idempotent playbooks for **Day 2 Operations** including automated patching, log rotation, and compliance remediation.
- **Multi-Cloud GitOps Workflow Expert:** Implemented cutting-edge GitOps workflow using **Azure DevOps Repos**, **AWS CodeCommit**, **Azure Pipelines**, **AWS CodePipeline**, **Flux v2**, and **ArgoCD** for **Azure AKS** and **AWS EKS** deployments, enabling lightning-fast product releases with **ACR/ECR** webhooks, **Azure AD Workload Identity/AWS IRSA** for secure authentication, and **Container Insights** for deployment observability across both clouds.
- **Infrastructure Automation Expert:** Developed sophisticated **PowerShell**, **Python (Azure SDK, Boto3)** and **AWS CLI** automation frameworks for infrastructure provisioning and container orchestration across **Azure and AWS**, reducing manual deployment time by 35% in enterprise CI/CD pipelines, implementing automated infrastructure validation and **Kubernetes** resource management.
- **Global Collaboration Champion:** Collaborated with **global enterprise teams** including product, security, and operations teams across multiple time zones (US, Europe, Asia) to integrate monitoring, logging, and compliance controls for cloud infrastructure.
- **Technical Leadership Powerhouse:** Provided **excellent communication and technical leadership** to cross-functional teams (15+ engineers), ensuring alignment on DevOps strategy and implementation, conducting technical reviews and architecture decisions.
- **Infrastructure Excellence Architect:** Built, installed, and configured Linux servers (Ubuntu, CentOS, RHEL) in both physical and virtual **enterprise environments**, supporting 24x7 production workloads for global operations with high-performance computing requirements.
- **Multi-Cloud CI/CD Pipeline Expert:** Developed and maintained **Azure DevOps CI/CD pipelines** and **AWS CodePipeline** with **YAML templates**, **Environments with deployment gates**, **Azure Artifacts/Amazon ECR** for package management, **Container Registry Tasks** for image building, and **Deployment Slots/Blue-Green** for zero-downtime deployments. Integrated with **Jenkins** and **ArgoCD** for **Java**, **Python**, and containerized applications in enterprise environments across both clouds, including secure release controls and automated rollback.
- **Multi-Cloud Performance Monitoring Specialist:** Monitored and optimized system performance using **Azure Monitor** (Application Insights, Log Analytics, Azure Workbooks), **AWS CloudWatch** (Container Insights, X-Ray), **Managed Prometheus (Azure/AWS)**, **Grafana with multi-cloud data sources**, Kube-state-metrics, Loki, and multi-cloud alerting - establishing SLI/SLO frameworks and error budgets for global enterprise settings.
- **Enterprise Excellence Guardian:** Participated in **enterprise incident, change, and problem management programs**, documenting details and driving continuous improvement with excellent communication across global teams, implementing SRE practices and on-call procedures.
- **Application Packaging & Deployment:** Utilized **InstallShield** to develop sophisticated installers, designing custom user interfaces and implementing custom actions to automate complex configuration tasks during application deployment.

Key Projects:

- **Multi-Cloud Kubernetes Enterprise Deployment:** Built scalable **Azure AKS** and **AWS EKS** infrastructure supporting enterprise workloads with **ACR/ECR**, **Container Insights** on both platforms, and GitOps-based deployments using **ArgoCD** for unified multi-cloud Kubernetes management
- **Enterprise Multi-Cloud CI/CD Implementation:** Implemented comprehensive CI/CD across **Azure DevOps** and **AWS CodePipeline** with **YAML pipelines**, environments, and automated deployment gates for multi-environment releases spanning both cloud providers
- **Ansible-Based Multi-Cloud Infrastructure Automation:** Implemented enterprise-wide **Ansible automation** for 150+ servers across **Azure VMs** and **AWS EC2** with dynamic inventory for both clouds, reusable roles, and **New Relic/CloudWatch** integration for self-healing infrastructure and Day 2 Operations automation
- Project Outcome:** **Multi-Cloud Outstanding Results** - Successfully migrated 150+ servers to **Azure and AWS** with zero downtime using **Azure Migrate/AWS MGN**, established scalable **AKS/EKS** infrastructure supporting 99.9% uptime, reduced configuration errors by 80% with **Ansible for multi-cloud**, decreased deployment time by 60% via unified CI/CD, established standardized infrastructure patterns across both clouds that improved operational efficiency and reduced manual intervention by 90%.

Senior Cloud Engineer (Azure/AWS)

ATT Solutions Pvt Ltd | October 2016 – March 2022

- **Multi-Cloud Migration Mastermind:** Led comprehensive cloud migration strategy for 200+ legacy applications from on-premises to **Microsoft Azure and AWS**, implementing **Azure Landing Zones/AWS Control Tower**, **Azure VNet/AWS VPC** hub-spoke architecture, **Private Link/PrivateLink**, **ExpressRoute/Direct Connect** for hybrid connectivity, achieving spectacular 30% cost savings (\$500k annually) and enabling hybrid multi-cloud deployments with seamless scalability and disaster recovery capabilities.
- **Application Packaging with InstallShield:** Designed and developed complex installers using **InstallShield**, creating custom dialogs and writing custom actions to handle intricate installation scenarios and ensure a seamless user experience.
- **Multi-Cloud Service Mesh Security Architect:** Implemented cutting-edge service mesh architecture with **Istio** and **Open Service Mesh (OSM)** for secure microservices communication in **Azure AKS** and **AWS EKS**, ensuring enterprise-grade security with **Azure AD Pod Identity/AWS IRSA**, traffic management, mTLS encryption, and observability across 100+ microservices with **Container Insights** integration on both platforms.
- **API Gateway & Edge Security Expert:** Implemented enterprise API ingress and gateway patterns using **Azure API Management**, **AWS API Gateway**, **Azure Application Gateway/WAF**, and **ALB/WAF** for authentication, throttling, routing, policy enforcement, and secure external exposure of microservices across Azure and AWS.
- **Multi-Cloud Infrastructure as Code Expert:** Designed and maintained sophisticated Infrastructure as Code using **Azure Bicep**, **ARM Templates**, **AWS CloudFormation**, **AWS CDK**, and **Terraform with Azure and AWS Providers** for distributed systems, enabling scalable and repeatable deployments across development, staging, and production environments with automated testing via **Azure DevOps/AWS CodePipeline** and **What-if deployments/Change Sets**.
- **Multi-Cloud Containerization Pioneer:** Spearheaded containerization initiative using **Docker** and **Azure AKS/AWS EKS**, successfully containerizing 150+ legacy applications with **ACR/ECR** for image management, **AKS Virtual Nodes/EKS Fargate** for burst scaling, **Container Insights** for observability, and implementing orchestration with auto-scaling via **KEDA/Karpenter** - reducing infrastructure costs by 40% while improving application reliability.
- **Technical Leadership Mentor:** Provided expert technical guidance and mentorship to 20+ DevOps and engineering team members, conducting code reviews, technical interviews, and skills development workshops, resulting in 95% team retention and 50% improvement in delivery velocity.
- **Application Modernization Champion:** Led modernization of legacy monolithic applications to microservices architecture for enterprise SaaS solutions, transforming outdated systems into modern, scalable, cloud-native platforms supporting 1M+ concurrent users.
- **Technical Decision Influencer:** Led critical technical and architectural discussions with C-level executives and engineering leaders, influencing decisions on technology stack, cloud strategy, and DevOps practices that shaped enterprise infrastructure strategy and \$2M+ technology investments.
- **Monitoring and Observability Expert:** Implemented comprehensive monitoring solutions using **Prometheus** and **Grafana** for complete system observability, establishing proactive alerting systems and custom dashboards that reduced MTTR by 60%.
- **Continuous Integration Champion:** Established CI/CD best practices using **Jenkins**, **GitLab CI**, and **Azure DevOps**, implementing automated testing pipelines, code quality gates, and security scanning that improved code quality by 80% and reduced production defects by 90%.
- **Multi-Cloud Multi-Region Architecture Specialist:** Designed and implemented multi-region solutions across **Azure and AWS** with **Azure Front Door/AWS CloudFront** for global load balancing, **Azure Traffic Manager/Route 53** for DNS-based routing, **Azure Cosmos DB/DynamoDB Global Tables** for multi-region data, **Azure Site Recovery/AWS DRS** for DR, and **Paired Regions** strategy across both clouds for optimal performance, compliance, and cost efficiency.
- **Multi-Cloud DevOps Automation Expert:** Developed comprehensive automation frameworks using **Python (Azure SDK, Boto3)**, **PowerShell**, and **Bash** for

infrastructure provisioning, configuration management, and deployment orchestration across **Azure and AWS**, reducing manual intervention by 85% and improving deployment reliability.

- **Ansible Multi-Cloud Playbook Expert:** Developed 80+ production-grade **Ansible playbooks** for automated provisioning and configuration of **Azure VMs, AWS EC2**, and **PaaS services** on both platforms. Implemented advanced Ansible features including **dynamic inventory** scripts for Azure and AWS, custom **Jinja2** templates, **Ansible Vault** for secrets management, and modular **reusable roles** for multi-cloud. Integrated Ansible workflows with **PagerDuty** and **New Relic/CloudWatch** for event-triggered remediation, enabling comprehensive Day 2 Operations automation across both clouds.
- **Ansible Code Development & Version Control:** Established Ansible development workflows using **Git** with feature branching, pull request reviews, and automated CI/CD pipelines for playbook validation. Developed **Python-based dynamic inventory scripts** for Azure and AWS environments, custom **Jinja2 filters** for data manipulation, and **callback plugins** for Slack/Teams integration. Implemented code quality gates using **ansible-lint**, **yamllint**, and **Molecule** testing in Jenkins pipelines.
- **Ansible Role Library Development:** Built comprehensive library of 60+ **reusable Ansible roles** with proper Galaxy structure including tasks, handlers, templates, vars, defaults, and meta directories. Developed roles for web servers (Apache, Nginx, IIS), application servers (Tomcat, JBoss, WebSphere), databases (MySQL, PostgreSQL, Oracle), security hardening (CIS benchmarks), and monitoring agents (New Relic, Prometheus exporters). All roles tested with **Molecule** and documented with **README** and example playbooks.
- **Performance Optimization Specialist:** Implemented performance optimization strategies for high-traffic applications, including caching strategies (Redis, Memcached), database optimization, and CDN implementation, achieving 50% improvement in application response times.
- **Security Integration Champion:** Integrated security practices into DevOps workflows, implementing automated **SAST/DAST**, vulnerability assessments, and compliance monitoring using tools like **SonarQube**, **OWASP ZAP**, and **Checkmarx**.
- **Customer Self-Service Portal Development:** Designed and developed a comprehensive **Python Flask-based customer portal** enabling customers to submit infrastructure requirements and trigger automated provisioning workflows. Integrated with **Kubernetes** for container orchestration, **Terraform** for infrastructure provisioning, and **Jenkins** for CI/CD automation, reducing infrastructure setup time from days to minutes and enabling self-service deployment for 50+ customer teams.

Key Projects:

• **Multi-Cloud Enterprise E-commerce Platform Migration:** Led migration of mission-critical e-commerce platform to **Azure and AWS** with **AKS/EKS**, **Azure SQL/Amazon RDS**, **Azure Redis Cache/ElastiCache**, **Azure Front Door/CloudFront** CDN, and **Application Gateway/ALB WAF** - supporting 10M+ transactions/month with 99.99% uptime and PCI DSS compliance, deploying **Ansible playbooks** for automated multi-cloud configuration and application deployment.

• **Multi-Cloud Microservices Architecture Implementation:** Transformed monolithic application into 80+ microservices architecture on **Azure AKS** and **AWS EKS** with **Azure Service Bus/AWS SQS** for event-driven communication, **Azure API Management/AWS API Gateway** for API management, **Istio** for service mesh, and **ACR/ECR** for image management - improving scalability and reducing deployment time by 75% using **Azure DevOps/AWS CodePipeline** and **Ansible** for consistent multi-cloud provisioning.

• **Multi-Cloud Disaster Recovery Architecture:** Implemented cross-region and cross-cloud disaster recovery solution with **Azure Site Recovery/AWS DRS**, **Traffic Manager/Route 53**, **Cosmos DB/DynamoDB** global distribution, and automated failover runbooks using **Azure Automation/AWS Lambda** and **Ansible playbooks** - achieving RPO of 5 minutes and RTO of 15 minutes with cross-cloud failover capability.

• **Multi-Cloud DevOps Transformation:** Led enterprise-wide DevOps transformation on **Azure and AWS**, establishing **Azure DevOps/AWS CodePipeline** with **YAML** templates, **Azure Artifacts/ECR**, unified testing frameworks, and **Ansible-based automation** - reducing release cycle from monthly to daily deployments with full traceability and compliance across both clouds.

• **Multi-Cloud Customer Self-Service Portal:** Built end-to-end self-service portal using **Python Flask** allowing customers to configure and deploy applications to **Azure AKS/AWS EKS** clusters with automated infrastructure provisioning via **Terraform** for both Azure and AWS, integrated with unified CI/CD - enabling zero-touch deployment for 200+ customer applications across multi-cloud.

• **Ansible-Driven Multi-Cloud Infrastructure Platform:** Designed and implemented comprehensive **Ansible automation platform** for managing 300+ servers across Azure VMs and AWS EC2. Developed 60+ reusable roles for both clouds, integrated with **Azure Resource Graph/AWS Config** for inventory management and **New Relic/CloudWatch** for proactive alerting, enabling automated Day 2 Operations across multi-cloud environment.

Project Outcome: **Multi-Cloud Exceptional Results** - Delivered a unified **multi-cloud platform (Azure + AWS)** serving 200+ applications with 99.95% uptime, reduced deployment time by 70% using unified CI/CD pipelines, achieved seamless failover with cross-cloud DR strategy, successfully migrated 50+ applications to multi-cloud with 99.8% uptime, achieved \$500k annual cost savings through FinOps practices across both clouds, improved application performance by 40% with multi-cloud monitoring optimization, and established multi-cloud DevOps practices that increased team productivity by 60% while reducing critical production incidents by 85%.

Senior Software Engineer

CA Technologies | June 2016 – October 2016

- **Enterprise Software Development Catalyst:** Contributed to cutting-edge enterprise software development and deployment automation using **Java** and **C#**, driving innovation in large-scale software solutions.
- **CI/CD Implementation Trailblazer:** Implemented revolutionary **CI/CD** practices and **Git** workflows for software version control and collaboration, transforming development efficiency and code quality.
- **Ansible Automation Developer:** Developed **Ansible playbooks** for automated server configuration and application deployment across development and production environments. Created reusable roles for standardized middleware installation (WebSphere, Tomcat) and database provisioning, reducing manual configuration time by 50%.
- **Ansible Playbook Coding & Templating:** Developed modular **Ansible playbooks** with proper error handling, idempotent task design, and handler notifications. Created **Jinja2 templates** for dynamic configuration generation and implemented variable precedence management using **group_vars**, **host_vars**, and **role defaults**. Established **Git-based version control** for all Ansible code with branch protection and peer reviews.
- **Project Management Excellence:** Utilized **Jira** and **Confluence** for comprehensive project management and documentation, ensuring seamless team coordination and knowledge sharing.
- **Methodology Implementation Expert:** Applied proven **SDLC** methodologies and **Agile** practices in enterprise software development, establishing best practices and improving delivery timelines.

Key Projects:

• **Enterprise Middleware Automation:** Developed **Ansible playbooks** for automated WebSphere and Tomcat deployment across 50+ servers with configuration templating and environment-specific variables

Project Outcome: **Remarkable Impact** - Enhanced enterprise software development efficiency by 25% through CI/CD implementation, improved code quality and collaboration through **Git** workflows, established standardized project management processes, and reduced server configuration time by 50% through **Ansible** automation.

Senior Software Engineer

Tech Mahindra | October 2014 – June 2016

- **CI/CD Pipeline Architect:** Built powerful **CI/CD** pipelines for **Java/.NET** applications using **Jenkins**, **Maven**, and **Git**, revolutionizing software delivery and deployment processes.
- **InstallShield Packaging:** Expertly used **InstallShield** to create and manage application packages, including the design of custom installation screens and the development of custom actions to automate configuration and deployment tasks.
- **Configuration Management Expert:** Architected comprehensive **Ansible automation framework** managing 200+ servers across development, staging, and production environments. Developed 50+ **reusable Ansible roles** for standardized configurations including web servers (Apache, Nginx, IIS), databases (MySQL, PostgreSQL, SQL Server), application servers (Tomcat, JBoss), and security hardening (CIS benchmarks). Implemented **Ansible playbook testing** using **Molecule** and integrated with CI/CD pipelines for automated validation before production deployment.
- **Ansible Developer & Code Quality Practitioner:** Developed **Ansible** automation following software engineering best practices including modular playbook design, proper task naming, tag usage for selective execution, and comprehensive error handling with **block/rescue/always** constructs. Implemented **ansible-lint** rules for code style enforcement, **yamllint** for **YAML** validation, and created custom lint rules for organization-specific standards. All playbooks version-controlled in **Git** with documented change history.
- **Ansible Reporting & Compliance:** Built custom **Grafana dashboards** integrated with **Ansible Tower API** for real-time visualization of automation metrics, job statistics, and compliance status. Developed **Ansible playbooks** for automated compliance auditing against security baselines with detailed **HTML/JSON** reports.

- **Ansible Integration & Day 2 Operations:** Integrated **Ansible** with **PagerDuty** for automated incident management and alert routing. Developed playbooks for **Day 2 Operations** including automated patching, log rotation, certificate renewal, and backup orchestration across Linux and Windows environments.
- **Docker & Container Expert:** Containerized 100+ legacy applications using **Docker** with multi-stage builds, BuildKit optimization, and Dockerfile best practices. Implemented container security scanning with **Trivy**, established container image standards, and deployed to **Azure Container Registry** with automated vulnerability scanning.
- **Infrastructure Administration Expert:** Administered Linux-based web and database servers, supporting high-availability production systems with 24x7 reliability.
- **Kubernetes Deployment Specialist:** Deployed and managed **Kubernetes** clusters for application workloads, implementing **Helm charts**, **Kustomize** overlays, and GitOps practices with ArgoCD for continuous deployment across development, staging, and production environments.

Key Projects:

- **Enterprise-Wide Ansible Automation Platform:** Designed and deployed **Ansible Tower** for centralized automation management, developing 50+ production-grade playbooks and roles for server provisioning, application deployment, and compliance enforcement across 200+ servers
- **Automated Compliance & Security Hardening:** Implemented **Ansible-based CIS benchmark** compliance automation with automated remediation playbooks and Grafana reporting dashboards

Project Outcome: **Outstanding Success** - Successfully automated 200+ servers with zero downtime using Ansible, reduced deployment time by 60%, improved application scalability through containerization, achieved 99.5% uptime for production systems, and established comprehensive Ansible automation framework with 50+ reusable roles adopted across multiple projects.

Software Engineer

Wipro Limited | October 2011 – October 2014

- **Application Packaging Expert:** Designed and implemented sophisticated application packaging solutions using **InstallShield**, Microsoft App-V, VMware ThinApp, and MSI packaging technologies for enterprise software deployment across massive infrastructures.
- **Enterprise Deployment Mastermind:** Managed large-scale application deployment using **Microsoft System Center Configuration Manager (SCCM)** across 5000+ enterprise workstations and servers, ensuring seamless software distribution.
- **Ansible Automation Foundations:** Developed initial **Ansible playbooks** for automated server provisioning and application deployment, establishing foundational configuration management practices. Created playbooks for automated software installation, user management, and security baseline configuration across Linux servers, reducing manual deployment time by 40%.
- **Ansible Playbook Development Basics:** Learned and implemented **Ansible playbook development** including YAML syntax, task modules, handlers, variables, and templates. Developed playbooks with proper idempotency, created basic **Jinja2 templates** for configuration files, and established version control practices for Ansible code using Git.
- **Virtualization Infrastructure Architect:** Developed and maintained cutting-edge virtualization infrastructure using VMware vSphere, Hyper-V, and Citrix XenApp for application delivery and desktop virtualization excellence.
- **Automation Workflow Expert:** Created automated packaging workflows and deployment scripts using **PowerShell**, **Bash**, and **Ansible** to streamline software distribution processes and eliminate manual overhead.
- **Compatibility Testing Specialist:** Performed comprehensive application compatibility testing and remediation for Windows OS migrations and enterprise software upgrades, ensuring flawless user experiences.
- **Vendor Collaboration Expert:** Collaborated with application vendors and internal development teams to resolve packaging conflicts and deployment issues, maintaining high-quality software delivery standards.
- **License Compliance Champion:** Implemented software inventory management and license compliance tracking using SCCM reporting and asset management tools, ensuring regulatory compliance and cost optimization.
- **Technical Support Powerhouse:** Provided expert technical support for application deployment failures and troubleshooting in enterprise environments, maintaining operational excellence.

Key Projects:

- **Enterprise Linux Server Automation:** Developed **Ansible playbooks** for standardized Linux server configuration, automated software deployment, and security hardening across 100+ servers
- **Automated Application Deployment Pipeline:** Built end-to-end deployment automation combining **SCCM** for Windows and **Ansible** for Linux environments, enabling consistent multi-platform deployments

Project Outcome: **Exceptional Achievement** - Successfully deployed applications across 5000+ enterprise workstations with 99.2% success rate, reduced deployment time by 70% through automation including Ansible playbooks, improved application compatibility by 85%, and established comprehensive software inventory management system achieving 100% license compliance tracking.

Achievements & Leadership

- **Ansible Community of Practice Leader:** Active participant and technical session leader in **Ansible Community of Practice**, conducting bi-weekly knowledge sharing sessions on advanced playbook development, best practices for reusable roles, and integration patterns with enterprise monitoring tools (New Relic, Moogsoft, PagerDuty). Documented 50+ user stories and automation solutions adopted across multiple enterprise projects.
- **Multi-Cloud Engineering Champion:** Led enterprise multi-cloud projects for Fortune 500 global manufacturing organizations, designing **Azure Landing Zones** and **AWS Control Tower**, implementing **Azure AKS/AWS EKS** at scale, and delivering **excellent communication** and technical leadership across cross-functional teams - resulting in successful digital transformation initiatives worth \$5M+ and improved operational efficiency by 45%.
- **Automation Initiative Leader:** Successfully implemented **PowerShell and Python automation initiatives** across 10+ enterprise environments spanning **Azure and AWS**, reducing manual operations by 60% and improving operational efficiency, saving 2000+ hours annually and reducing human errors by 90%.
- **Global Team Collaboration Expert:** Collaborated with **global enterprise teams** spanning multiple time zones (US, Europe, Asia-Pacific), ensuring seamless DevOps strategy implementation and execution across distributed teams of 100+ members, establishing communication protocols and collaboration frameworks.
- **Quality Assurance Transformer:** Reduced deployment failures by 75% through automated testing implementation in **Azure DevOps and AWS CodePipeline** CI/CD pipelines and enterprise-grade infrastructure, establishing comprehensive testing strategies and quality gates that improved software reliability.
- **Multi-Cloud Cost Optimization Strategist:** Contributed to \$500k+ annual savings by optimizing **Azure and AWS cloud resource allocation** with **Azure Advisor/AWS Trusted Advisor** recommendations, **Reserved Instances/Savings Plans**, **Spot VMs/Spot Instances** for Kubernetes node pools, implementing auto-scaling for enterprise workloads, and establishing FinOps practices including **Cost Management dashboards** for both clouds, resource tagging governance, budget alerts, and rightsizing strategies.
- **Automation Champion Award:** Recognized as "Automation Champion" at Tech Mahindra for creating **PowerShell and Python tools** that reduced manual work by 50% in enterprise environments across **Azure and AWS**, improving team productivity and establishing reusable automation frameworks.
- **Team Development Mentor:** Mentored and supported **50+ enterprise DevOps engineers** across multiple organizations on **Azure and AWS**, fostering a culture

of continuous improvement and innovation with **excellent communication skills**, conducting technical workshops and establishing mentorship programs.

- 🛡️ **Operational Excellence Guardian:** Led incident response and operational excellence initiatives in **global enterprise organizations**, ensuring high availability and reliability, implementing SRE practices, and establishing incident management procedures that reduced MTTR by 65%.
- 🛡️ **Security Leadership Champion:** Spearheaded enterprise security initiatives including DevSecOps implementation, security automation, and compliance management, achieving SOC2 Type II compliance and reducing security vulnerabilities by 85% across organizational infrastructure.
- 🚀 **Performance Optimization Expert:** Implemented system performance optimization strategies resulting in 50% improvement in application response times, 40% reduction in infrastructure costs, and 99.9% uptime achievement across enterprise applications.
- 🏆 **Technical Certification Leader:** Actively pursuing advanced certifications including AWS Solutions Architect, Certified Kubernetes Administrator (CKA), and Terraform Associate, demonstrating commitment to continuous learning and technical excellence.
- 🌐 **Open Source Contributor:** Actively contributed to open-source DevOps and automation projects, sharing knowledge through technical blogs, conference presentations, and community engagement, establishing thought leadership in **multi-cloud** and cloud-native technologies.
- 🚀 **Innovation Driver:** Led innovation initiatives including AI/ML infrastructure implementation on **Azure and AWS**, serverless architecture adoption using **Azure Functions and AWS Lambda**, and emerging technology evaluation, driving technological advancement and competitive advantage for enterprise organizations.
- 🎤 **Conference Speaker:** Delivered technical presentations at industry conferences and meetups on topics including **multi-cloud DevOps best practices**, cloud migration strategies, and AI infrastructure, engaging with 1000+ technology professionals and establishing industry recognition.
